

Which Mac are you?

Portables

MacBook

The next-generation MacBook.

The new MacBook has something for everyone. Less than an inch thin and 4.5 pounds, it fits your backpack (and your mobile lifestyle). It offers great integrated graphics performance for playing 3D games or creating photo books in iPhoto and making movies in iMovie. And it has all the MacBook features you want at a price you'll adore.

Starting at \$1499

MacBook Air

The world's thinnest notebook.

The world's thinnest notebook. MacBook Air travels light. At just 3 pounds, it sets a new standard for mobile computing — without scrimping on features. With more power, advanced NVIDIA graphics, a 13.3-inch screen, full-size keyboard, and breakthrough wireless innovations, MacBook Air is engineered to take on the world.

Starting at \$2699

MacBook Pro

The ultimate mobile powerhouse.

It's all about performance. If you want desktop-class graphics and a bigger display, you want the all-new MacBook Pro. With a double graphics punch — both integrated and discrete NVIDIA graphics processors — the 15-inch MacBook Pro is fast enough to run the most graphic-intensive games and professional applications, but portable enough to come along for the ride.

Starting at \$2999

Mac mini

Small is beautiful.

Simple but powerful, Mac mini is the low-cost dynamo that packs a complete Mac experience into a 6.5-inch-square frame. And it all happens with the blazing speed of the Intel Core 2 Duo. Just connect your own display, keyboard, and mouse — Mac mini brings the rest. Starting at only \$899, it's the most affordable way to get a Mac.

iMac

The ultimate all-in-one

Beauty and brains come together in this amazingly slim, all-in-one design. iMac packs a complete, high-performance computer into a sculpted, thin design. Available in 20- and 24-inch widescreen models, iMac includes built-in wireless, Mac OS X Leopard, and iLife '08. So you have everything you need right out of the box.

Starting at \$1849

Mac Pro

The fastest Mac ever.

The new Mac Pro is up to two times faster than the previous generation.¹ There's 8-core processing power in the standard configuration. New Quad-Core Intel Xeon processors run at speeds up to 3.2GHz. And every system supports up to two 30-inch Apple Cinema HD Displays. Since the Mac Pro offers millions of configuration possibilities, your imagination finally meets its match.
